SECTION I: PROGRAM GUIDELINES

A. DEFINITION OF AN UNDERGRADUATE TEACHING ASSOCIATE (UTA)

An Undergraduate Teaching Associate (UTA) in the Medical Sciences Program is a student who assists faculty, associate instructors, and laboratory directors with the teaching mission of the program. UTAs primarily help in teaching laboratories but also in other essential roles as specified for each course.

The UTA plays a critical role in creating a small class atmosphere in a large class. As a UTA you will have the opportunity to better understand how people learn while you develop your communication and leadership skills. Participation in this program is an award and as such is reserved for the truly outstanding undergraduate student.

B. ELIGIBILITY

To be eligible for this teaching internship in Medical Sciences, students should have junior or senior class standing (at least 60 credit hours completed) and have an overall GPA of at least 3.0. Exceptional freshman and sophomores may be considered as well. You may be enrolled in the course at the time of your application. A student must have completed a course before beginning work as a UTA for that course.

C. UTA PROGRAM STAFF

PROGRAM DIRECTOR
Rick Mynark, Ph.D.
004 Jordan Hall
855-9067
rmynark@indiana.edu

ADMINISTRATIVE ASSISTANT
Jennifer Barron
Administrative Secretary
104 Jordan Hall
855-0616
jebarron@indiana.edu
D. **APPLICATION PROCEDURE**

The application is online and can be found here:

https://iu.co1.qualtrics.com/jfe/form/SV_4GejqDzlQhPm1cF

---

**2020-2021 APPLICATION DEADLINES**

**SPRING 2021 POSITIONS:**  
**NOVEMBER 6TH, 2020**

**2021 SUMMER AND FALL POSITIONS:**  
**APRIL 16TH, 2021**

Applicants typically will be notified of awards by email within two weeks after the application deadline. At this time, those accepted to the program will be further advised about registration, scheduling and orientation.

---

E. **COMPENSATION OPTIONS**

If selected, you may choose one of the following two compensation options:

1. **M499: Internship in Medical Sciences Instruction**
   This is a 3-credit hour course that will appear on your transcript as evidence that you were a Medical Sciences UTA. UTAs are graded based on the performance evaluations by their AIs and the observations of their Lab Coordinator. UTAs may take this course up to two times for credit. If you choose this option, you will need to be authorized to enroll in M499 by the Program Director.

2. **Hourly Pay Compensation:**
   Students who choose this option will receive bi-monthly paychecks over the semester they teach. The monthly paychecks will be based on the hours worked and the tentative rate of $15.00 / hour (before taxes). Prior to the semester of teaching, students must go to Jordan Hall 105 and fill out a W-4 tax form and an I-9 form (a form which indicates you are legally allowed to work in the U.S. - you will be required to provide either a passport, or a driver's license and social security card. For further information about the I-9 form and what documents may be used to establish employment identity, please refer to the sample I-9 form found at:
F. **PARTICIPATION OF UTAs**

Undergraduate teaching assistants make a vital contribution to the instruction of students enrolled in medical sciences classes. Students chosen as UTAs have done well in one or more of these courses and now have the chance to share their grasp of the subject with others. As partners in the process of education, we appreciate UTA's interest and enthusiasm for the courses, and we're counting on their motivation and initiative to maintain and improve the course standards.

There are a few fundamental points that guide all who teach.

The education of students is one of the main reasons for our presence here. Throughout the semester, UTAs work with many students - sometimes in groups and sometimes individually. Treat them with the respect every person deserves. Observe confidentiality with regard to conversation, class performance and grades.

The process of teaching depends on sustained effort to carry out many duties and meet repeated deadlines. As basic as it may seem, one of the UTAs most important contributions is a dependable presence in scheduled sessions. A second basic contribution is the ability to finish assigned tasks.

We're all in this together. Realize that, as part of a teaching group, UTAs have a lot of support around them. Lab Directors, AIs and faculty are available to help. We hope that when UTAs think about their time as teaching assistants, they believe they gained much more than a stipend or a few credit hours from the experience.

G. **UTA EVALUATIONS**

Evaluations of each UTA's performance will be handled within that UTA's specific course. Those evaluations will be forwarded to the Program Director in situations where remediation or further actions are deemed necessary. All UTAs have the right to appeal evaluations that they feel do not accurately represent their performance.

In the case of A215 and P215, a standardized UTA evaluation form will be used by the AIs who work directly with a UTA. This evaluation will be performed twice during the semester and will be used to let UTAs know how they are performing relative to expectations, as well as provide a basis for grading in M499. This evaluation form should be reviewed by every UTA prior to the beginning of the semester so they can familiarize themselves with those expectations.
# H. UTA Evaluation Form

## AI's Evaluation of UTA Performance

<table>
<thead>
<tr>
<th>Performance Criteria</th>
<th>Needs Improvement</th>
<th>Satisfactory</th>
<th>Exceptional</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Attendance</strong></td>
<td>&gt; 2 days missed</td>
<td>1-2 days missed</td>
<td>0 days missed</td>
</tr>
<tr>
<td><strong>Willingness to Work</strong></td>
<td>just stands there and lets the AI do the work</td>
<td>will help if asked</td>
<td>assists students, peers, and superiors without being asked</td>
</tr>
<tr>
<td><strong>Attitude</strong></td>
<td>&quot;I don't care, I don't want to be here&quot;</td>
<td>&quot;I'm here, and I'll just do what I have to do&quot;</td>
<td>&quot;I'm glad to be here and I'll encourage student interaction&quot;</td>
</tr>
<tr>
<td><strong>Motivation</strong></td>
<td>doesn't care about teaching</td>
<td>shows motivation occasionally</td>
<td>displays motivation on a regular basis</td>
</tr>
<tr>
<td><strong>Work with Individuals</strong></td>
<td>hesitates to interact with students on an individual basis</td>
<td>will answer questions for individuals</td>
<td>provides guidance and recommends learning strategies on an individual basis</td>
</tr>
<tr>
<td><strong>Work with Groups</strong></td>
<td>hesitates to interact with students in a group</td>
<td>will answer questions for individuals in a group</td>
<td>will direct and lead groups; involves all students in the group</td>
</tr>
<tr>
<td><strong>Presentation</strong></td>
<td>presentation is not clear and organized</td>
<td>organized, but small problems (e.g., too fast, too slow, difficult to hear, etc.)</td>
<td>organized, clear, enthusiastic, paced well, no problems</td>
</tr>
<tr>
<td><strong>Preparation</strong></td>
<td>prepared on occasion</td>
<td>just covers the basics</td>
<td>always prepared and ready to go one step farther</td>
</tr>
<tr>
<td><strong>Follows Instructions</strong></td>
<td>has to be told repeatedly</td>
<td>redirected on occasion</td>
<td>needs no redirection</td>
</tr>
<tr>
<td><strong>Initiative</strong></td>
<td>needs to be told to do everything</td>
<td>occasionally needs to be told to do something</td>
<td>a self-starter, looks for something to do</td>
</tr>
<tr>
<td><strong>Enthusiasm</strong></td>
<td>pessimistic &amp; complaining</td>
<td>mild enthusiasm</td>
<td>very enthusiastic</td>
</tr>
<tr>
<td><strong>Respect of Student</strong></td>
<td>openly criticizes or speaks negatively of students</td>
<td>keeps comments and opinions to themselves</td>
<td>always respectful, and will even discuss strategies to work with all students</td>
</tr>
<tr>
<td><strong>Confidentiality</strong></td>
<td>discusses confidential matters with peers</td>
<td>usually conscious of this privilege but has mistakenly provided confidential information</td>
<td>always conscious of and never abusive of this right</td>
</tr>
<tr>
<td><strong>Completes Tasks</strong></td>
<td>doesn't complete tasks</td>
<td>completes required tasks, but may be late</td>
<td>completes all required tasks on time</td>

**Comments:**
SECTION II: POSITION DESCRIPTIONS

ANATOMY A215: BASIC HUMAN ANATOMY (5 CR.)
(OFFERED FALL, SPRING, SUMMER II)

A. COURSE DESCRIPTION

This course presents a systemic approach to the study of the human body. Lecture presentation begins with an introduction to anatomical terminology and an overview of cellular processes and tissue classification. Students learn the gross and microscopic anatomy of the following systems: skeletal, muscular, integumentary, nervous, circulatory, respiratory, digestive, urinary, and reproductive. The laboratory component of the course reinforces lecture concepts through the use of models, histological slides, and cadaver demonstration. Lectures meet three times weekly. Students also attend two 1 hour and 45 minute labs per week. (Note: during Summer II, lectures are presented daily and students attend a 1 hour and 45 minute lab four times per week.)

B. SUPERVISION

Course Directors:

Valerie O’Loughlin Steve Dougherty Polly Husmann
Jordan Hall 010A Jordan Hall 003 Jordan Hall 112
855-7723 855-9742 856-2373
vdean@indiana.edu gdougher@indiana.edu phusmann@indiana.edu

Course Coordinator and Laboratory Director:

Stacey Dunham
Classroom Office Building 126
855-4991
dunhams@indiana.edu

Associate Instructors:

Two AIs per lab section will serve as mentors for the UTA.
C. A215 UTA Training Workshops

A training workshop is held each term to familiarize A215 UTAs with their responsibilities and the laboratory teaching environment. This workshop is typically held at 8:00pm on the Sunday prior to the start of that term's classes in the Anatomy Laboratory (Classroom Office Building, room 122). UTAs will be notified of the exact time and location at least one week prior to the actual meeting. Attendance at this orientation is REQUIRED.

D. Responsibilities of the UTA

The responsibilities of the UTA are primarily in the laboratory portion of the course. In each lab, the UTA will assist two Associate Instructors (AIs). Each UTA is assigned one laboratory section for the semester. Lab sections meet for 1 hour and 45 minutes, two days per week (total weekly laboratory time = 3.5 hours). The responsibilities of an Undergraduate Teaching Associate include the following:

1. Answering students' questions about appropriate lab topics during scheduled lab periods, and actively assisting students while there to learn the material. However, UTAs should not assist students outside the laboratory setting.

2. Presenting a 10-20 minute introduction on the appropriate lab topics for four labs per semester, as arranged in advance with the AIs.

3. Assisting the Lab Director during one of the 50 minute open labs each time they are scheduled (typically four times per semester).

4. Being present and assisting at a weekend 2-hr lab review session (four weekend review sessions per semester). The AIs will be present as well to assist students.

5. Assisting in checking lab materials at the end of each lab period and each review session, following explicitly defined procedures.

6. Proctoring all A215 lecture exams. The first three exams are held at 4:40pm on Fridays (for the Fall and Spring semesters). The date and time of the final exam varies from semester to semester. At least one of the two AIs will be present as well to help proctor the exam.

7. Also, to avoid conflicts of interest, UTAs must not be present for setting up or proctoring lab exams, and do not participate in grading them.
D. **Responsibilities of the UTA (cont.)**

We do not want a conflict of interest to arise if a friend or relative of a UTA is in his/her assigned lab. Thus, UTAs will not be responsible for setting up, proctoring, and grading lab exams.

There may be the possibility that an exceptional applicant would be selected to assist the course director with the lecture component of the course. This lecture UTA must attend lecture during regular lecture times, and be available for three hours (office hours) each week. Lecture UTAs work closely with the course director. Please indicate on your application if you also would like to be considered for a lecture UTA position.

E. **Evaluation of Performance**

Performance evaluation is an important part of the instructional process. Evaluation of UTA performance typically will be conducted twice during each semester. This evaluation will be conducted by the associate instructors.

The criteria used to evaluate UTA performance are outlined on the **UTA Evaluation Form** on page 5 of this Handbook. The first mid-semester evaluation for the UTA will provide feedback regarding performance and emphasize the areas where improvement may be needed. The evaluation at the end of the semester will be one of several criteria used to assess the UTA’s overall performance.
**Physiology P215: Basic Human Physiology (5 cr.)**
*(Offered Fall, Spring, Summer II)*

A. **Course Description**

P215 is a systemic approach to the study of human body function. The course assumes a working knowledge of the structural components of the body and appropriate terminology. The course begins with the molecular and cellular mechanisms essential to homeostasis in the human body. After the fundamental mechanisms of homeostasis are presented, the course progresses to describe the actions of the nervous, muscular, endocrine, cardiovascular, immune, renal, respiratory, and digestive systems coordinate to maintain life. The laboratory emphasizes application of material presented during the lecture portion and is a required part of this course. Students enrolled in P215 during the Fall and Spring semesters have four 50-minute lectures and one 2-hour laboratory per week. During the Summer II Session, enrolled students have daily 90-minute lectures and two 2-hour laboratories during the week.

B. **Supervision**

**Course Directors:**

Mark Ronan  
Jordan Hall 010B  
855-8411  
mronan@indiana.edu

Rick Mynark  
Jordan Hall 004  
855-9067  
rmynark@indiana.edu

Bruce Martin  
Jordan Hall 200  
855-0982  
martin1@indiana.edu

**Course Coordinator and Laboratory Director:**

David Matlack  
Classroom Office Building 207  
855-4774  
dmatlack@indiana.edu

**Associate Instructors:**

One AI per lab section will serve as a mentor for the UTA.
C. **P215 UTA ORIENTATION MEETING**
An orientation meeting will be held each semester to familiarize P215 UTAs with their responsibilities and the laboratory teaching environment. This meeting will be held prior to the start of classes each semester and will be held in the Human Physiology Lab in the Classroom Office Building (room 120). UTAs will be notified of the exact time and location at least one week prior to the actual meeting. Attendance is **REQUIRED**.

D. **RESPONSIBILITIES OF THE UTA**

1. Work in coordination with the AI to guide and facilitate the active participation of each student and their group in the designated lab activities for the each lab. UTAs should report poor participation or irresponsible activity to their AI when such behavior is observed. UTAs should also lead by example.

2. Answer student questions concerning both protocols and concepts associated directly with the particular lab.

3. Assist with clean-up and preparation of lab materials for the next lab.

4. Manage the collection of data sheets and quizzes, and help maintain a record of lab scores, attendance and participation.

5. Present introductory material for one lab each semester in an area which is of interest. This will be a coordinated decision between each AI and UTA.

7. UTAs may NOT tutor ANY P215 students outside of class. This includes lab and lecture material.

E. **EVALUATION OF PERFORMANCE**
Evaluation of UTA performance will be conducted each semester. This evaluation will be conducted by the associate instructors. The criteria used to evaluate UTA performance are outlined on the **UTA Evaluation Form** on page 5 of this Handbook. The evaluation will be one of several criteria used to assess the UTA’s overall performance.
A. **COURSE DESCRIPTION**

Disease and the Human Body introduces students to the human body from a medical research viewpoint. We discuss a number of diseases that people experience. As we discuss these medical conditions, we see how they affect the structure and disrupt the function of a healthy body. We also look into the factors that determine who suffers from these conditions, what may bring them about and how and to what extent they can be treated or cured. Human diseases provide invaluable insights into how the body works. We hope that students will leave the course with a better understanding of the human body and human disease and also the relevance of the medical sciences to human health.

B. **SUPERVISION**

*Course Director*
Rick Mynark
Jordan Hall 004
855-9067
rmynark@indiana.edu

C. **RESPONSIBILITIES OF THE UTA**

The responsibilities of the UTA vary according to the learning strategies in use and the skills and interest of the person chosen as UTA. The various duties that might be involved include these assigned during the current semester:

1. Attendance at every lecture is required (three 50-min sessions each week).
2. Grading of problem-solving sessions.
3. Writing one test question during or after each lecture.
4. Providing office hours and a review session in the last few days before each examination.
5. Taking notes during each lecture, and then providing copies of these notes to students who miss class with excused absences.
6. Prepare a study guide provided for students prior to each examination.
D. **EVALUATION OF PERFORMANCE**

UTAs are provided informal feedback regarding their work throughout the course from the Course Director, with more complete but still informal feedback given at the end of the course. Formal evaluations of UTAs by the students are not conducted. A written assessment or evaluation of the UTA's performance will be provided upon request to the Course Director.
M216: MEDICAL SCIENCE OF PSYCHOACTIVE DRUGS (4 CR.)
(OFFERED FALL AND SPRING)

A. COURSE DESCRIPTION

Psychoactive drugs pervade modern societies, yet few understand how they work, why they are so potent, and how they affect all levels of the body. This course examines how these drugs act both within the brain and throughout the rest of the body. We learn why these drugs can sometimes cause addiction, why addiction can cause disease both inside and outside the brain, and why other psychoactive compounds can instead cure disease without serious negative effects on the body. The course presents scientific evidence about these drugs in an evenhanded manner. The class uses a range of active learning strategies, and emphasizes "soft" skills such as work ethic, people skills, and discussion participation, in addition to "hard" skills such as information accumulation.

B. SUPERVISION

Course Director
Bruce Martin
Jordan Hall 200
855-0982
martin1@indiana.edu

C. RESPONSIBILITIES OF THE UTA

The responsibilities of the UTA vary according to the learning strategies in use and the skills and interest of the person chosen as UTA. The various duties that might be involved include these assigned during the current semester:

1. Attendance at every lecture is required (two 75-min sessions each week). During class sessions, UTA's typically participate in small group discussion with selected students, and may grade and disseminate written materials.

2. Grading of class assignments inside and outside of class, including assessment of homework, quizzes, and selection of "winners" of the daily homework competition.

3. Writing one test question during or after each lecture.
C. **RESPONSIBILITIES OF THE UTA (CONT.)**

4. Evaluating test questions generated by students in class, and choosing one question to be placed in the upcoming exam.

5. Providing office hours and a review session in the last few days before each examination.

6. Taking notes during each lecture, and then providing copies of these notes to students who miss class with excused absences.

7. A class tradition for the UTA to prepare a study guide provided for students prior to each examination. The previous semester's guide serves as a template, but is updated each semester to reflect the particular areas of emphasis of the current material.

D. **EVALUATION OF PERFORMANCE**

UTAs are provided informal feedback regarding their work throughout the course from the Course Director, with more complete but still informal feedback given at the end of the course. Formal evaluations of UTAs by the students are not conducted. A written assessment or evaluation of the UTA's performance will be provided upon request to the Course Director.
M375: Parasitology (4 cr.)
(Offered Spring)

A. Course Description
This course will cover basic concepts in parasitology such as host-parasite relationships; ecology and co-evolution of parasite and host; basic mechanisms of parasitic diseases and the human immune response; survey the major groups of important human and domestic animal protozoal, helminth, and arthropod parasites focusing on taxonomy, biology, life cycle, epidemiology, pathogenesis, diagnosis and treatment. Laboratory will use live and fixed specimens and emphasize microscopy and methods in parasite identification and diagnosis.

B. Supervision
Course Director
David C. Matlack, DVM
Classroom Office Building 207
855-4774
dmatlack@indiana.edu

C. Responsibilities of the UTA
The chief responsibility of the UTA is in the laboratory portion of the course. Lab meets every Friday 8-10:50am.

Specific laboratory responsibilities include:
1. Arriving 15-45 minutes prior to every lab to help set out specimens and slides. The UTA will be notified by email the expected arrival time each week.

2. Assisting students with proper use of the compound microscope. UTAs must be fully proficient with the compound light microscope at all magnifications.

3. Assisting students with any questions they may have during lab.

4. Ensuring that students have properly cleaned and stowed the microscopes.

5. Ensuring that all fixed specimens are properly put way and that all live specimens are properly disposed of per the instructor's instructions.
C. **Responsibilities of the UTA** (cont.)

6. There may be certain times outside of lab when the UTA will need to assist the instructor in preparing laboratory materials. This will not be an excessive time requirement.

General UTA duties and guidelines:

1. While the UTA does not grade quizzes, lab reports or exams, the UTA may be asked to mark missing areas of pre-lab and lab assignments.

2. To avoid conflict with family or friends, the UTA will not proctor or set-up lab exams beyond assisting in setting up microscopes.

3. The UTA may not tutor any M375 student outside of class.

D. **Evaluation of Performance**

Performance evaluation is an important part of the instructional process. Evaluation of UTA performance typically will be conducted twice a semester. This evaluation will be conducted by the Instructor using as a rubric the UTA Evaluation Form in the Medical Science UTA Handbook.

The first mid-semester evaluation will provide feedback regarding performance and emphasize the areas where improvement may be needed. Improvement in these areas will be an important consideration in the final course evaluation.
SECTION III: GUIDELINES FOR UTAS

A. CODE OF ETHICS

UTAs must NEVER discriminate against students on ANY basis whatsoever. Examples include, but are not limited to race, gender, religion, age, physical disability, nationality, political view, sexual orientation, campus affiliations, personal appearance or previous performance in the course. Treat ALL students equally and fairly.

UTAs must NEVER show favoritism to students on ANY basis whatsoever. Examples include, but are not limited to race, gender, religion, age, physical disability, nationality, political view, sexual orientation, campus affiliations, personal appearance or previous performance in the course. Treat ALL students equally and fairly.

UTAs must respect each student's individuality and innately different approaches to life and problem solving. There are many ways to solve a problem; you are encouraged to share what works for you, but don't try to force your style onto students.

UTAs must respect each student's sense of personal worth and refrain from statements or behaviors that belittle others. Never make negative or derogatory comments about students either inside or outside the classroom.

UTAs must keep all information about their students and student performances confidential. Teachers have a moral and legal obligation to their students to keep this information confidential. This includes grades, answers to problems, personal discussions, and anything else that might be sensitive.

UTAs must never provide early access to examination materials to any student for any reason.

Behavior unbecoming of a UTA will result in appropriate disciplinary action. This disciplinary action includes, but is not limited to, immediate dismissal, receiving a failing grade for M499 and initiation of a formal complaint to the Dean of Students.
B. **Teaching Tips**

Greet students in courteous and friendly fashion, both inside and outside the classroom.

Give sincere positive reinforcement whenever possible. Positive comments do more than anything else to spur students to higher levels of achievement.

Help students develop their own solutions to problems or answers to questions, rather than simply showing them a solution. It will help them little to watch you do it; it will help them a lot if they do it themselves.

Encourage students to talk to each other, working out problems together when they cannot solve them alone. When they can solve problems alone, encourage them to check their solutions with others.

If you don't know the answer to a question, say so, for example, "I don't know, but let's find out." If you find the answer, and help your students find the answer, you encourage scientific exploration and collaboration.

Be prepared! Your students will not be impressed if you show up unprepared for your sessions.

Plan ahead and show up for all obligations. If you have an unavoidable conflict, arrange in advance for another UTA to substitute, as by swapping times.

Remember that while your goal is to help students learn the course material, you are also teaching them how to study and how to learn. If they learn how to work independently in this course, they will be able to succeed in later courses.

Lastly, discourage direct questions about what will be on the exam. Remind students that you are there to help them gain understanding of concepts presented in the course, not to give them information about exams.
